in production and shall provide a complete listing and production capacity of all major equipment (e.g.: name, type, manufacturer, number of machines, and other descriptive data deemed essential to make an evaluation of capacity), used in each stage. The bidder shall indicate for each production stage whether the work is done in-house, the number of persons working in that stage, and their qualifications. When personnel divide their time among several production stages, the model shall indicate this by showing the number of full-time people for each stage, e.g., stage 1: 4-1/2 people, stage 2: 7-1/4 people, etc. The bidder shall also include any other information that affects production capacity or reliability. For example, narrative may be added to describe factors that present a potential impact on capacity, such as award of other pending bids.

### **L.3.2 SPC Form Format**

Using the formats shown on the SPC form (Section J), the bidder shall summarize current production capacity. Rows may be added to or deleted from the tables, as needed to fit the bidder's production process, but the columns must not be changed. Bidders are encouraged to use actual data from annual production records, whenever possible, in the column "Output/Hr./Person, Machine, etc." on the current capacity chart. If actual data are used, then "Operating %" may be put at 100%, and the contractor shall add a note explaining that this has been done.

As part of the determination of responsibility, the Library will determine estimated production capacity based on this Statement of Capacity, as well as prior experience with the bidder, taking into consideration a combination of quality and delivery performance under contracts in current production and/or in the preceding three fiscal years, and based on inspection of plant, equipment, staff and actual operating conditions.

### **L.3.3 Organizational Chart**

An organizational chart shall be included with the procedures identifying personnel responsible for each step in production operations together with their qualifications. (See H.10)

### **L.3.4 Current Contractors**

This packet should include a copy of the latest SPC worksheet with only the changes, if any, noted. The abbreviated Volume II must also include a summary sentence that estimates total capacity for this product in terms of how many magazine titles, total transcribed pages, and total braille pressings.

### **L.3.5 Section 5 - Use of Subcontractors**

Bidders must identify all subcontractors and their responsibility with the project. Similar technical information, names of key personnel, etc. and financial information required to determine responsibility of the prime contractor must be submitted for all subcontractors. - (a) The government will evaluate bids in response to this solicitation without discussions and will award a contract to the responsible bidder whose bid, conforming to the solicitation, will be most advantageous to the government considering only price and the price-related factors specified elsewhere in the solicitation.
- (b) The government may (1) reject any or all bids, (2) accept other than the lowest bid, and (3) waive informalities or minor irregularities in bids received.
- (c) The government may accept any item or group of items of a bid, unless the bidder qualifies the bid by specific limitations. Unless otherwise provided in the Schedule, bids may be submitted for quantities less than those specified. The government reserves the right to make an award on any item for a quantity less than the quantity offered, at the unit prices offered, unless the bidder specifies otherwise in the bid.
- (d) A written award or acceptance of a bid mailed or otherwise furnished to the successful bidder within the time for acceptance specified in the bid shall result in a binding contract without further action by either party.

A bid is materially unbalanced when it is based on prices significantly less than cost for some work and prices which are significantly overstated in relation to cost for other work, and if there is a reasonable doubt that the bid will result in the lowest overall cost to the government even though it may be the low evaluated bid, or if it is so unbalanced as to be tantamount to allowing an advance payment.

Failure to furnish samples on time will require rejection of the bid, except that a late sample sent by mail may be considered under the Late Submissions, Modifications, and Withdrawals of Bids provision of this solicitation.
- (c) Bid samples will be tested or evaluated to determine compliance with all the characteristics listed for examination in this solicitation. Failure of these samples to conform to the required characteristics will require rejection of the bid. Products delivered under any resulting contract must conform to (1) the approved sample for the characteristics listed for test or evaluation and (2) the specifications for all other characteristics.
